

CloudChain posture report

Scan real-324a6772c4 | real mode | 2026-08-04T08:00:42.116554+00:00

67 / 100
GRADE C

Posture 67/100 (grade C). 33.2 points were deducted across four dimensions; privilege is the largest single contributor at -16.9.

How the score was calculated

Exposure		5.8 / 25
Privilege		16.9 / 25
Reachability		10.5 / 30
Blast radius		0.0 / 20

Dimension	Deducted	What it measured
Exposure	5.83 / 25	4 internet-reachable finding(s) totalling 14 severity pressure.
Privilege	16.88 / 25	5 identity weakness(es) totalling 27 privilege pressure.
Reachability	10.50 / 30	No internet-reachable route, but 1 escalation chain(s) reach AdministratorAccess from 1 identity/identities.
Blast radius	0.00 / 20	No internet-exposed entry point into the resource graph.

Findings by severity

Attack paths

Routes an unauthenticated attacker can walk, from an internet entry point to AdministratorAccess.

None found.

Escalation routes

Routes that open once the starting identity is compromised. Latent privilege-escalation primitives, not live breach routes.

CRITICAL

- iam_role 'LabOrchestratorRole' in 701589665274 holds IAM write permissions and can grant itself AdministratorAccess in 701589665274

All findings (11)

#	Score	Severity	Issue	Resource
1	10.0	CRITICAL	IAM_PRIVILEGE_ESCALATION_RISK	LabOrchestratorRole
2	9.0	HIGH	S3_PUBLIC_ACCESS	leaky-bucket-701589665274-us-east-1

#	Score	Severity	Issue	Resource
3	9.0	HIGH	IAM_USER_NO_MFA	701589665274
4	3.0	MEDIUM	IAM_CROSS_ACCOUNT_TRUST	LabOrchestratorRole
5	1.5	LOW	S3_AWS_OWNED_ENCRYPTION_KEY	leaky-bucket-701589665274-us-east-1
6	1.5	LOW	S3_NO_VERSIONING	leaky-bucket-701589665274-us-east-1
7	1.0	LOW	IAM_ROLE_ADMIN_ACCESS	OrganizationAccountAccessRole
8	1.0	LOW	IAM_CROSS_ACCOUNT_TRUST	OrganizationAccountAccessRole
9	1.0	LOW	IAM_ROLE_ADMIN_ACCESS	stacksets-exec-43bd003f43dfcdc460afa4cce84b613e

11	1.0	LOW	IAM_WEAK_PASSWORD_POLICY	account

Remediation

IAM_PRIVILEGE_ESCALATION_RISK on LabOrchestratorRole

Scope iam:PassRole to specific role ARNs with a condition, and remove IAM write permissions this identity doesn't need.

S3_PUBLIC_ACCESS on leaky-bucket-701589665274-us-east-1

Enable all four Block Public Access settings and remove public grants from the bucket ACL/policy.

IAM_USER_NO_MFA on 701589665274

Enforce MFA for this user (console) and prefer temporary credentials over long-lived access keys.

IAM_CROSS_ACCOUNT_TRUST on LabOrchestratorRole

Scope the trust policy to the specific role that needs it, add an sts:ExternalId condition, and reduce the role's permissions to least privilege.

S3_AWS_OWNED_ENCRYPTION_KEY on leaky-bucket-701589665274-us-east-1

Switch this bucket to SSE-KMS with a customer-managed key, and enable an S3 Bucket Key to keep request costs down.

S3_NO_VERSIONING on leaky-bucket-701589665274-us-east-1

Enable versioning on the bucket.

IAM_ROLE_ADMIN_ACCESS on OrganizationAccountAccessRole

No action required unless this role should not exist. Verify the account it trusts is your own organisation management account.

IAM_CROSS_ACCOUNT_TRUST on OrganizationAccountAccessRole

Confirm that 116457965582 is an account you recognise. If it isn't, treat this as urgent.

IAM_ROLE_ADMIN_ACCESS on stacksets-exec-43bd003f43dfcdc460afa4cce84b613e

No action required unless this role should not exist. Verify the account it trusts is your own organisation management account.

IAM_CROSS_ACCOUNT_TRUST on stacksets-exec-43bd003f43dfcdc460afa4cce84b613e

Confirm that 116457965582 is an account you recognise. If it isn't, treat this as urgent.

IAM_WEAK_PASSWORD_POLICY on account

Require a minimum length of 14+ with symbols, numbers, and mixed case.
